Profile

Energetic and highly motivated MERN Stack Developer, aiming for a seamless transition into the Web Development industry. A quick learner with excellent problem-solving abilities, strong attention to detail, and a commitment to achieving project goals. Seeking an entry-level position in your organization to apply acquired skills, contribute effectively, and embark on a successful career journey.

Projects

Potato

Food Delivery App (live)

- It is a MERN Stack project based on widely available food delivery apps such as Swiggy and Zomato.
- Users can create an account to order the available food items and place an order for the same.
- Payment window is set up using Stripe and COD is also available.
- Technologies Used - ReactJs, NodeJs, MongoDB, ExpressJs, Stripe, Render

iTicket

Movie Ticket Booking App

- Developed in NextJs and Typescript the app is used to book movie show tickets on the platform.
- There is an admin dashboard where the admin adds the movies, theatres and shows which then gets displayed on the user side.
- The users can select the movie, theatre, showtime and select the seats needed and complete the payment using Razorpay payment gateway and receive the booking details as a whatsapp message with the QR code.
- Technologies used - NextJs, NodeJs, ExpressJs, MongoDB, TypeScript, RazorPay, Google Auth Sign In, Twilio

Morental

Car Rental App

- Developed in NextJs and Typescript the app is used for renting cars on the platform.
- There is an admin dashboard where the admin adds the rentable cars and user bookings
- The users can select their desired car for available dates and view it in the user dashboard
- Technologies used - NextJs, NodeJs, GraphQL, PostgreSQL, ExpressJs, Razorpay
